DETAILED ACTION

1. According to paper filed on Jan. 13, 2010, the applicants have elected group I without traverse for further prosecution.
2. Claims 1-23, 25 and 26 are pending in the application.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12, 14-23, 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In independent claim 1, the term --- compound comprising formula 1 ----- is vague and indefinite since it is not clear whether compounds are represented by formula (I) or some other unknown structure having formula (I) embedded somewhere in the unknown structure. Also, it is not clear where the compound is acted upon by an enzyme with aromatase activity? Is it in vivo or in vitro?

5. Claims 1-12, 14-23, 25 and 26 are objected for containing non-elected subject matter.

Allowable Subject Matter

6. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The instant compounds directed to the elected group are allowable over the prior art since they are neither disclosed nor obvious over the prior art. In the prior art, Smith (WO 02/099424, cited on applicant's form 1449) discloses Acridone derivatives (see example 1 on page 31 and example 12 on page 49) which are closely related to the instant compounds. However, the compounds of Smith differ in structure by having different values of instant variables L and S and furthermore, there is no teaching, suggestion or motivation in the prior art to modify the compounds of Smith to prepare the instant compounds.
